Aesthetic Life
Beauty and Art in Modern Japan
Miya Elise Mizuta Lippit

This study of modern Japan engages the fields of art history, literature, and cultural studies, seeking to understand how the “beautiful woman” (bijin) emerged as a symbol of Japanese culture during the Meiji period (1868–1912). As Japan worked to establish its place in the world, it actively presented itself as an artistic nation based on these ideals of feminine beauty. The book explores this exemplary figure for modern Japanese aesthetics and analyzes how the deceptively ordinary image of the beautiful Japanese woman—an iconic image that persists to this day—was cultivated as a “national treasure,” synonymous with Japanese culture.

An Introduction to Chinese Poetry

From the Canon of Poetry to the Lyrics of the Song Dynasty

Michael A. Fuller

★ 2019 Franklin R. Buchanan Prize for Asia Curriculum Materials, Association for Asian Studies

This innovative textbook for learning classical Chinese poetry moves beyond the traditional anthology of poems translated into English and instead brings readers—including those with no knowledge of Chinese—as close as possible to the texture of the poems in their original language. The first two chapters introduce the features of classical Chinese that are important for poetry and then survey the formal and rhetorical conventions of classical poetry. The core chapters present the major poets and poems of the Chinese poetic tradition from earliest times to the lyrics of the Song Dynasty (960–1279).

Voting as a Rite
A History of Elections in Modern China
Joshua Hill

For over a century, voting has been a surprisingly common activity in China. Voting as a Rite examines China’s experiments with elections from the perspective of intellectual and cultural history. Rather than arguing that such exercises were either successful or failed attempts at political democracy, the book instead focuses on a previously unasked question: how did those who participated in Chinese elections define success or failure for themselves? Answering this question reveals why Chinese elites originally became enamored of elections at the end of the nineteenth century, why critics complained about elections that featured real competition in the early twentieth century, and why elections continued to be held after the mid-twentieth century even though outcomes were predetermined by the state.

Shrines to Living Men in the Ming Political Cosmos
Sarah Schneewind
The first book to focus on premortem shrines in any era of Chinese history, it places the institution at the intersection of politics and religion. When a local official left his post, grateful subjects housed an image of him in a temple, requiting his grace: that was the ideal model. By Ming times, the “living shrine” was legal, old, and justified by readings of the classics.
